

**Common Table of Allowances
50-909**

Field and Garrison Furnishings and Equipment

Headquarters
Department of the Army
Washington, DC
1 August 1993

UNCLASSIFIED

Field and Garrison Furnishings and Equipment

By Order of the Secretary of the Army:

GORDON R. SULLIVAN
General, United States Army
Chief of Staff

Official:

MILTON H. HAMILTON
Administrative Assistant to the
Secretary of the Army

History. This issue publishes a revision of this publication. Because the publication has been extensively revised, the changed portions have not been identified.

Summary. This Common Table of Allowances (CTA) is an authorization document under the provisions of AR 71-13 providing flexible basis of issue which may be used to acquire certain common items of field and garrison furnishings and equipment.

Applicability. This CTA applies to the Active Army, Army National Guard, and the U.S. Army Reserve. This CTA applies during partial and full mobilization.

Interim Changes. Interim changes are not official unless authenticated by the Administrative Assistant to the Secretary of the Army. Users will destroy interim changes on the expiration dates unless sooner superseded or rescinded.

Suggested Improvements. Users are invited to send comments and suggested improvements on DA Form 2028 (Recommended Changes to Publications and Blank Forms) directly to Commander, U.S. Army Force Integration Support Agency, Bldg 201 (Stop 587), ATTN: MOFI—SDC—E, Fort Belvoir, VA 22060-5587.

Distribution. Distribution of this CTA is made in accordance with the requirements on DA Form 12-04E, block number 0043, intended for command levels A, B, C, D, and E for Active Army, Army National Guard, and U.S. Army Reserve.

Glossary

1. Purpose

The purpose of this Common Table of Allowances is to provide an authorization document according to the provisions of AR 7 1-13. This CTA provides flexible bases of issue which may be used by commanders having jurisdiction over the functions concerned to acquire certain common items of field and garrison furnishings and equipment. No additional documentation is required. This CTA generally applies to MTOE/TDA/JTA units/activities, to appropriated fund elements thereof, and to individuals therein. See each table for additional application as appropriate.

2. References

Required and related publications and prescribed and referenced forms are listed in appendix A.

3. Explanation of abbreviations and terms

Abbreviations and special terms used in this CTA are explained in the glossary.

4. Special instructions

a. This CTA is the only authorization document for requisitioning the allowances of equipment listed. However, unless otherwise restricted by orders, regulations, or instructions contained in the separate paragraphs, only minimum quantities of that equipment considered essential for efficient operation of the function will be requisitioned. Requisition of CTA-authorized items is discretionary, not mandatory.

b. When a standard item is authorized in this CTA and a suitable nonstandard item is on hand, the nonstandard item will be retained in lieu thereof until unserviceable or no longer required.

c. An on-hand like item authorized by superseded CTA, but not authorized by this CTA, may be retained and accounted for as a substitute item under provisions of AR 710-2 until no longer serviceable or economically repairable. However, the total quantity on hand of the superseded item and the current item will not exceed the total authorized quantity of this CTA. If an item which was authorized by superseded CTA is on hand and there is no like item authorized by this CTA, the item is not authorized and will be processed for turn-in in accordance with established procedures.

d. Items of equipment listed in this CTA will not be taken by individuals/units/activities upon permanent change of station, nor will they be taken into the field during training or upon mobilization, except as authorized by AR 71-13 or by instructions in separate paragraphs or appendix B of this CTA or unless such action is directed by the authority ordering the change of station or mobilization.

e. This CTA may be used by managers at all echelons within the Army for use in developing requirements for authorized stockage lists (ASL).

f. An end item or set, kit, or outfit included in this CTA is the authority for acquisition of applicable repair parts, accessories, special tools, and components thereof which are shown in applicable technical manuals, set listings, and supply bulletins commensurate with the assigned responsibilities for maintenance of the unit and density of the authorized items. Expendable or durable items required for the efficient operation of the functions concerned will be obtained in accordance

with CTA 8-100 and CTA 50-970. Nonstandard maintenance parts and accessories for nonstandard items will be obtained in accordance with local procurement regulations.

g. If electrical items authorized herein do not have voltage compatibility with overseas application (see NSN under appropriate LIN, SB 700-20), authority to procure transformers or comparable electrical items locally is granted.

h. Authorizations in this CTA except for class V items is restricted to equipment costing less than \$15,000. Equipment costing \$15,000 and over except for class V items must be documented under provisions of AR 71-13/AR 310-49 and authorized in DA approved MTOEs and TDAs output from the DA TAADS.

i. Items listed in this CTA will be accounted for on property books in accordance with AR 7 10-2, which para 2-4c states that "Authorization documents take precedent over the accounting requirements code (ARC) on the AMDF for the purpose of property book accountability." With exception of table 7, all locally procured items identified with a NSLIN in the CTA will have accountability requirements determined LAW the criteria in AR 735-5, chapter 7.

j. The majority of items listed herein are authorized "in the clear" to individuals/units/activities or facilities as stated in the basis of issue, subject only to the discretion of the appropriate commander to requisition and the availability of funds. Items authorized should only be requisitioned when required for the necessary operation of the unit, military mission, or for discharge of assigned military duties, and then only in the quantities as necessary and required.

k. The "per requirement" basis of issue is used herein when a quantity to be authorized cannot be expressed in terms of a specific factor. The item, quantity and type of equipment authorized is determined locally within regulatory guidance, actual requirements, and availability of funds.

l. When an item is listed on an "or" basis, this will be interpreted as the total amount authorized will not exceed the allowance in the basis of issue.

m. Line item numbers ending with an "N" or "R" are nonstandard/noncatalogued equipment. These items, unless otherwise noted, can only be acquired by local procurement within the provisions of the Federal acquisition regulation (FAR).

n. The term "add per" is used in some of the bases of issue. Such a basis of issue is interpreted as follows. In some cases the basis of issue narrative itself contains the allowance quantity to be added. If this is not the case, the basis of issue means that an additional allowance of the same item is authorized in the quantity shown in the allowance column for that item.

5. Modifications

Requests for modifications to bases of issue and allowances in this CTA will be submitted through command channels to Commander, U.S. Army Force Integration Support Agency, ATFN: MOFI-SDCE, Building 201 (Stop 587), Fort Belvoir, VA 22060-5587, in accordance with the provisions of Chapter 5, AR 7 1-13. Requests for consideration of new CTA items must include specific data for each item: manufacturer (not vendor), model number, unit cost, detailed generic description, and picture or drawing (brochure, if available).

Notes:

- REFER TO AR 190-13 FOR USE OF THE JOINT-SERVICES INTERIOR INTRUSION DETECTION SYSTEM (J-SIIDS).
- CABINET SHOULD BE FASTENED SECURELY TO THE BUILDING AND, WHERE FEASIBLE, BE PROTECTED BY ON-DUTY PERSONNEL, A GUARD, OR A DISTURBANCE SENSOR.
- WEAPONS CABINET MODIFIED FOR ROTC WITH UNIVERSAL PULL-OUT CART FOR STORAGE OF .22 CAL RIFLES, PISTOLS AND AMMUNITION. OUTSIDE DIMENSIONS: 51¼H x 22W x 39D IN.
- NOT TO EXCEED SIX PER SECURITY CABINET LIN 92022N.
- COMMANDERS MAY SELECT FROM THE APPROPRIATE GSA FEDERAL SUPPLY SCHEDULE THE MOST COST EFFECTIVE TYPE OF EQUIPMENT THAT BEST SATISFIES THEIR REQUIREMENT.
- IF SPACE PERMITS, FILING DRAWERS MAY BE ADDED FOR STORAGE OF BOTH THE KW-7 EQUIPMENT AND SECRET INFORMATION, ALSO, SECRET INFORMATION MAY BE STORED IN ACCORDANCE WITH PARAGRAPH 4-8B, AR 380-40.
- WHEN USED IN OPERATIONAL/TRAINING CONFIGURATIONS, THIS CABINET REQUIRES A KW-7 CRYPTO-UNIT MODIFICATION AND A CP-12 CONTROL PANEL
